Features and Benefits of the PR-36-S Pipe Roller

The PR-36-S was developed for the contractor who uses a wide range of pipe sizes and varying job conditions. The large flat bottom base makes the unit very stable when used with large diameter pipe. The low profile allows the roller to be used on the ground or raised up on cribbing to a desired ground clearance. The unit does not need to be reconfigured or adjusted (1 roller, 2 bearings) to handle different sizes of pipe. The units can be relocated on the site by simply turning over onto the roller and rolled to the next spot. The units can be stacked atop each other for space saving storage. These rollers are very rugged and versatile and can be used for many different applications on the job.

<tbody>
<tr>
<td>Dimensions</td>
<td>26 1/2” x 28 1/2” x 15 1/2” H</td>
<td>Large stable base with low profile and stackable for storage and transport.</td>
</tr>
<tr>
<td></td>
<td>673mm x 724mm x 394mm H</td>
<td>Less movement on harder surfaces</td>
</tr>
<tr>
<td>Weight</td>
<td>147 lbs.</td>
<td>Large capacity for large pipe</td>
</tr>
<tr>
<td></td>
<td>(66.7 kg.)</td>
<td>No need to adjust or configure</td>
</tr>
<tr>
<td>Load capacity</td>
<td>5000 lbs.</td>
<td>Reduced bowing, bending or twisting</td>
</tr>
<tr>
<td>Pipe range</td>
<td>0-36” O.D.</td>
<td>Easy rolling and greaseable</td>
</tr>
<tr>
<td></td>
<td>(0-915mm O.D.)</td>
<td>Less deflection and weight stress</td>
</tr>
<tr>
<td>Base frame</td>
<td>8” x 11.5 structural channel</td>
<td>Resist wear and protects pipe coatings</td>
</tr>
<tr>
<td>Bearings</td>
<td>2 @ 2”</td>
<td></td>
</tr>
<tr>
